

## **Assignment 2**

### **Content Management - Lab**

On your WordPress website do the following requests, then take screenshots of what is required.

---

### **Requirements**

1. Make a new page about any subject of your choice and open it with Elementor.
2. It has to contain (heading, normal text, image, button, dividing line, image slider, video, counter).
3. It has to be at least 4 main sections.
4. Change the page background + the site (title logo).
5. Format and customize the page properly, choose colors, fonts, sizes .... etc.

More details:

6. Add an icon somewhere, and it should be (stacked).
7. Make the video view as a pop up, the play icon should be yellow, if the user put the mouse on the image, it does not stop scrolling.
8. The image slider should show 2 images on the page at a time, the time taken with each scroll is 6 seconds, use dots only and the color of the dot we are standing on should be red.
9. The counter should take 3 seconds, make the number over 1000 and separate it with a space.

### **Required Screen shots:**

1. Full screen shot of the page.
2. The video settings.
3. The image slider settings.
4. The counter settings.
